EDUCATION

INDIAN INSTITUTE OF TECHNOLOGY, MANDI Master of Technology in Research (M-Tech(R)) Indian Knowledge Systems(IKS)	Mandi, Himachal Pradesh 2024-2026
SANT LONGOWAL INSTITUTE OF ENGINEERING AND TECHNOLOGY Bachelor of Engineering (BE) Computer Science and Engineering Cumulative GPA: 8/10; Coursework: Data Base Management System, Object Oriented Programming, Data Structures and Algorithms.	Longowal, Punjab 2020-2024

SKILLS SUMMARY

• Languages:	JAVA, PYTHON, JAVASCRIPT, SQL
• Frontend:	HTML, CSS
• Framework:	SPRING, SPRING BOOT, NODE JS, REACT JS, FLASK
• Tools:	GIT, GitHub, Visual Studio Code
• Soft Skills:	Strong communication, Adept problem-solving, Teamwork and Collaboration, Effective time management
• Other:	Fluent in English, Telugu; Conversational Proficiency in Hindi

WORK EXPERIENCE

Web Application For Smart Complaint Tracking using IOT and AI: LINK RASHTRIYA ISPAT NIGAM LIMITED (RINL) ◦ Crafted a web application for complaint tracking. ◦ This innovative solution streamlines complaint submission, tracking, and resolution. ◦ My adept development skills have resulted in an efficient, impactful tool for optimized complaint management system.	VISAKHAPATNAM JUNE 2023 – JULY 2023
Java Full Stack Developer(Trainee): JSPIDERS JNTU HYDERABAD Present ◦ Gained in-depth knowledge of core Java concepts, object-oriented programming, data structures, and algorithms. ◦ Demonstrated ability to integrate front-end technologies like HTML, CSS, JavaScript, and frameworks with backend and SQL. ◦ Hands on experience in using Java Spring Boot for developing robust and scalable server-side applications.	HYDERABAD JULY 2024 -

PROJECTS(UNIVERSITY)

AUTOMATIC ENGLISH HANDWRITTEN TEXT RECOGNITION SYSTEM: LINK ◦ Spearheaded the development of an advanced system using cutting-edge deep learning algorithms, achieving a recognition accuracy of over 90% in converting handwritten English text into digital format. ◦ Implemented preprocessing techniques that resulted in a 20% enhancement in the accuracy and reliability of the recognition system, ensuring superior quality output.
FRAUDULENT JOB RECRUITMENT DETECTION USING MACHINE LEARNING: LINK ◦ The approach I used to identify the fake hiring ads and fraud job notifications across the internet uses various machine learning and NLP based approaches to identify the fake job from the description of the job text and to counter the measures from the model. ◦ I used supervised machine learning to make use of the several features that I extracted from the text for fake job detection using the data set extracted from Kaggle containing more than 18k job descriptions which shows the model to be more precise.

CERTIFICATIONS

Career Essentials in Generative AI by Microsoft and LinkedIn: LINK ◦ Gained hands-on experience in understanding and applying key principles of generative AI, including language models and image synthesis, enhancing capability to integrate AI-driven solutions. Learnt the core concepts of Artificial Intelligence -Machine Learning and generative AI functionality.
Career Essentials in GitHub Professional Certificate: LINK ◦ Acquired comprehensive skills in GitHub workflows, including repository management, branching, merging, and collaboration on open-source and team-based projects. Gained expertise in version control, enabling efficient tracking, updating, and reverting changes, ensuring code quality and project continuity in collaborative environments.

TECHNICAL PROFICIENCY

- Achieved a top-tier 5 ⭐ rating in Java and 4 ⭐ rating in Python Programming on **Hacker Rank**, also attained a commendable CodeChef rating showcasing strong programming skills and understanding of Programming concepts.
- Mastered fundamental Java syntax, proficiently utilizing control flow, loops, functions, and data structures.
- Attained a 4 week training for python in Narayana Technologies which helped me to develop knowledge in machine learning.
